

PST File Scenario Guide

IT Managers - Your Legal team is needing to search through all the files and data of a former employee. Are you confident you can find and access this data? Do you have any PST files within your data set that may hinder this search?

HR & Legal - You have received a Subject Access Request (SAR), which under GDPR means you have 30 days to complete and return all stored data. Is this possible?

CEOs - What would a breach of your data security and a leak of customer's information mean to your business and its reputation? PST files can put your business at risk of data loss.

CEOs - Information and data within your company is one of your biggest assets, can you afford to lose it? Are PST files allowing you to access all your data?

IT Managers - Your HR manager Jeremy leaves his laptop in a bar and it gets stolen. Whilst his laptop is encrypted and can be wiped remotely, the bag also contains a memory stick containing old PST files. Is your data safe?
